PRODUCT FEATURES

COSMEHYA has excellent moisturizing and lubricating properties, and it is internationally recognized as "natural moisturizing factor".

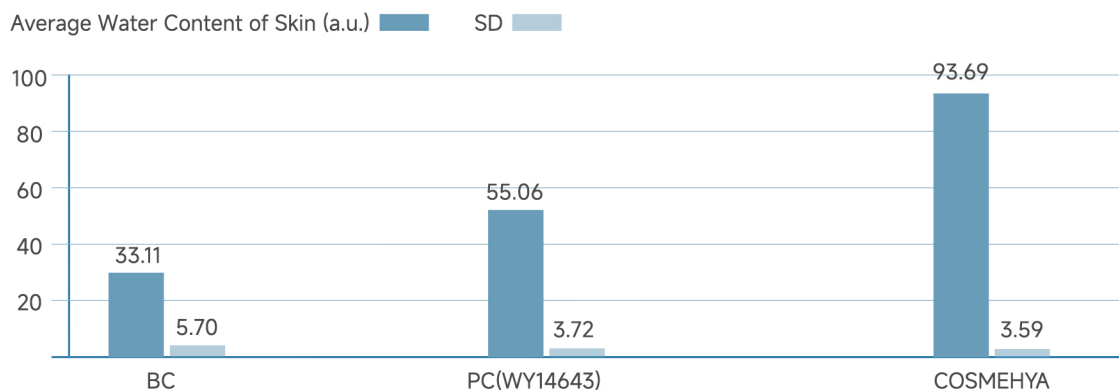

The aqueous solution of COSMEHYA has high viscosity, which can thicken the water phase, and the paste after emulsification with the oil phase is uniform and fine, and has the effect of stable emulsification.

COSMEHYA has good compatibility and can be widely added to cosmetics, such as cream, lotion, essence, facial cleanser, body wash, shampoo, conditioner, mousse and lipstick, etc.

EFFICACY STUDY

Topsience conducted a moisturizing test on COSMEHYA H220, COSMEHYA M180, and COSMEHYA SL40. The water content of the stratum corneum in the experimental group increased significantly, indicating that sodium hyaluronate can maintain the moisture on the skin surface, continuously moisturizing the skin, increasing the capacitance of the skin surface, and achieving skin moisturizing effect.
